JSI CABINETRY

Product and Price Guide

How To Place An Order

Online Ordering

Ordering online is the easiest, quickest and most efficient way of placing your orders!
Go to www.jsicabinetry.com and click on Dealer Login to get started.

When placing an order

- All orders/quotes must be placed on a JSI Order Form
- All orders must have a **Requested Ship/Pick-up Date** provided.
- All orders/quotes must have a P.O. number and account number provided.
- If asking for a quote only, please clearly State "Quote Only" on the order.
- A faxed or emailed order sent to JSI constitutes your desire to place an order. Once entered and acknowledged we do not require a signed copy of the acknowledgement for your order to go into production. For net term customers the order will go into production automatically. Prepaid orders will go into production once payment is received.

1. Please provide your account number on the JSI forms
2. A **Requested Ship/Pick-up Date** is now required on all orders. This information will allow us to more efficiently allocate inventory and schedule production. By providing this date, JSI can reduce backorders and lead time and quicken order pick-up. Failure to provide a Requested Ship/Pick-up Date will delay processing of the order. Orders not picked up within 3 days of the Requested Pick-up Date will be shipped to the ship to address on file at your expense.
3. Please provide a complete billing address. This address must match what was provided to us on your application
4. A customer **P.O. number is required**. To prevent duplicate orders/quotes in our system, you cannot use a P.O. number more than once.
5. Please provide a **complete ship-to address**. If shipping to the billing address you may just write "same". If shipping to another address please make sure the **complete address** is provided, including a contact name and phone number to call before delivery. Please check the "residential" box if the ship-to address is a residence or the delivery requires a liftgate.
6. In the ship-to box, please check of one of the following:
   - Pick-up: If you are picking the order up a ship-to address is not required
   - JSI Ship: If you want JSI to ship the order out a complete ship-to address is required.
   - Customer Ship: If you are setting up your own trucking company to pick up your order.

   A **complete** ship to address is required.
7. Please provide the **Acknowledgement email address** to ensure that it is received by the appropriate person. If no email address is given, the acknowledgement will be sent to the default address on the dealer application.
8. Please check a door style box.
9. Be sure to check the box indicating "Unassembled" or "Assembled". If neither is checked, the order process may be delayed.
10. If you want your order expedited, please check the "Quick ship" box. ***However, once you check this box, the order cannot be changed; it will be processed for shipping.***
11. Please fill in your quantity and our part number for ordering.
12. Submit your order form by 12:00 P.M. and expect confirmation via an acknowledgement by the end of the business day. Submit your order after 12:00 P.M. and receive an Acknowledgement by the end of the next business day.
13. Please look over your acknowledgement carefully. Please read all notes we may have added for you.
    - If there are any mistakes, or if you have a change (Quick ship orders cannot be changed), fax or email back your Acknowledgement noting the changes within 24 hours of receiving it.
    - If everything is correct, you do not need to send your acknowledgement back. Your order will be processed.
    - Orders for prepaid accounts will not go into production until paid for.
14. For Marketing, Replacement and Return requests please fill out the appropriate order forms and follow the previous twelve steps.

Combining orders for shipping

To consolidate orders into one shipment, the orders must be paid for at the same time under prepaid account terms **or** ordered at the same time under net terms. For net term customers the orders must be placed at the same time and clearly stated in writing that they need to be shipped together. Prepaid customers must pay for all orders that need to be shipped together at the same time. If a customer would like to hold orders until the freight minimum is reached, they must hold them together and send them in at the same time when they know the minimum has been met; JSI will not hold orders. All orders will be processed in the order in which they are received and processed accordingly for shipment.

Cancellations

Assembled orders – cancellations of pieces or complete orders will be processed at no charge until the cabinets are assembled. After assembly is complete, cancellations will not be permitted.

Unassembled orders – cancellations of pieces or complete orders will be processed at no charge until the order is prepared. Cancellations of pieces or entire orders made after the order is prepared but prior to shipping will be subject to a 25% cancellation fee.

Returns

Returns will not be accepted without proper authorization from JSI. It is the customer's responsibility to pay freight when returning product unless items are being returned due to a warranty or defect issue. Assembled product is non-returnable unless it is due to a warranty or defect issue. Unassembled product being returned will also be subject to a 25% restocking fee unless it is due to a warranty or defect issue. Unassembled product must be returned in its original packaging, having not been opened and repacked. Credit will only be issued after return to JSI pending an inspection of the product at our facility.

Damages / Shortages / Claims

When receiving a shipment, customer must note the amount of pallets and/or loose packages received and inspect all shipments upon delivery to their facility or job site. Damages and shortages must be noted on the delivery receipt at the time of delivery and notification filed with JSI by faxing or emailing in a Replacement Parts order form. Failure to note damages/shortages may result in the replacement being billable. Claims for loss or damage on any shipment must not be deducted from their invoice, nor payment of the invoice withheld awaiting adjustment of such issues from JSI.

Freight Charges

All list prices shown in this price book do not include freight charges. Prices shown are F.O.B. from point of manufacture.

Displays / Marketing Support

A display discount is available for product approved by JSI for showroom displays. Sample doors are available for $46/ea List. All literature is free of charge. Marketing material ships at no charge. Utilize a Marketing Order Form to order samples, literature, and other marketing materials.

Payments by Phone

If you would like to pay for your order(s) by credit card over the phone please contact our accounting department.

Freight Calculation Examples
based on NY rates

Order Total (net)	Freight Rate	Freight Charge For Order
$1,250.00	6.5%	$100

$1250 x .065 = $81.25

$81.25 is less than the New Freight mininum of $100 so the freight charge for this order is $100)

Order Total (net)	Freight Rate	Freight Charge For Order
$2,000.00	6.5%	$130

$2000 x .065 = $130.00

$130 exceeds the New Freight mininum of $100 so the freight charge for this order is $130

Jobsite / Residential / Liftgate fee - $150

Freight Rates from BOLINGBROOK, IL WAREHOUSE

General Shipping Information

Residential Delivery – Delivery is curbside only. This will delay delivery by 1 day due to a delivery appointment being required when shipping to residential addresses. This incurs a flat charge of $150.00 and will also include a lift gate if needed. Two people should be on site to offload in the event that an 8 foot-long pallet cannot be lowered with the driver's lift gate or if packages need to be brought from curbside into the home.

Self-storage delivery – JSI does not deliver to storage facilities, if a shipment is delivered to a storage facility and JSI is charged, the customer will be charged the $150.00 residential/jobsite/lift gate delivery fee.

Smaller Truck needed for delivery – Does not cost extra. If a smaller truck is required for delivery, this may delay a shipment by 1-2 additional days.

Lift Gates – This incurs a flat charge of $150.00 if is used which will be passed along to the customer if JSI is charged for this service upon delivery. If a customer requires a lift gate, they should note this information when placing their order. If the driver arrives and drops the lift gate without a customer's permission, the customer can avoid the lift gate fee by having the driver to put the pallet(s) back on the truck so that they can offload by hand or using their own forklift. Two people should be on site when receiving a lift gate delivery in the event that an 8 foot-long pallet cannot be lowered with the driver's lift gate or if packages need to be brought from curbside into the home or business.

8 foot-long pallets and Lift Gates – If a customer's shipment is delivered to a business (excluding storage facilities) on an 8 foot-long pallet and they are paying for a lift gate for their delivery, JSI will refund them the $150.00 lift gate fee if:

a. the driver is unable to lower the 8-foot pallet to the ground

b. the lift gate is not signed for on the Delivery Receipt as used

c. the shipment is not delivering to a residential address.

If the shipment is delivering to a residential address, the $150.00 fee is not refundable. Two people should be on site to offload when delivering to a residential address or businesses without a dock for this reason and if packages need to be brought from curbside into the home or business.

Larger shipments of 10 Pallet spots or more – Unlike smaller shipments, shipments of 10 pallet spots or more (over 20-feet of trailer space) are sent on a dedicated truckload. JSI is not able to send these shipments out via common carrier. Drivers of these trucks are not equipped with pallet jacks, so the customer would have to offload the shipment themselves using their own pallet jack or offloading by hand or using their forklift. Unlike smaller shipments where the customer only has 30 minutes to offload, the customer will get up to 2 hours to offload the truck before accumulating detention fees. Any detention fees incurred from this will be the responsibility of the customer to pay for.

No inside deliveries – JSI does not authorize inside deliveries. Curbside delivery only for residences and businesses without a loading dock. Customers will be responsible for this charge if levied by the carrier. Fees vary by carrier.

Terminal pick-up –The customer must indicate the actual shipping address on their order form. If a customer requires a terminal pick-up, the customer must make those arrangements directly with the carrier.

Dock to dock/business to business – no additional shipping charges will be incurred unless the carrier determines the delivery to be in a residential or limited-access area. Any additional charges levied by the carrier must be approved through JSI. The customer will be responsible for any additional unapproved charges.

Not dock to dock – the delivery recipient is permitted 30 minutes for unloading. If the driver is detained beyond the allotted time due to manual unloading or absence of a loading dock, a fee will be incurred for every time-unit beyond the initial 30 minutes. Time-units and fee varies by carrier and is the responsibility of the customer to pay.

continued on next page

General Shipping Information

continued from previous page

Driver assist – not all carriers provide driver assistance; normally they will only push product to the rear of the truck. During delivery, if a customer asks the driver to assist in offloading, a fee may be charged. Fee varies by carrier and is the responsibility of the customer to pay.

Re-delivery fee – This will be invoiced to customer if no one is present to accept delivery during customer's normal receiving hours or within agreed upon delivery appointment window.

Receiving freight – JSI urges that customer's take multiple pictures of each pallet and loose package upon its arrival showing shrink wrap intact. Verify that pallet count and loose package count are accurate. The driver cannot be detained while every pallet or piece is opened so as not incur a detention fee. If, however, visible damage to a pallet or loose package is evident, the recipient may open to inspect damages. Missing items or damages should be noted on the delivery receipt.

Carrier information on invoices – The carrier name, telephone# and pro# will be noted on customers' invoices which will be sent to them at midnight on the night their order ships. Should the information be missing or they do not receive their invoice, they may call JSI for this information the day after the order ships.

Notification Call (call prior to delivery) – JSI can request a call (1 hour or 30 minutes) prior to delivery but JSI cannot guarantee this request due to the road laws preventing drivers from using their cellular phones. In the case of a delivery notification call (30 minutes or 1 hour prior), someone MUST answer or the driver will assume no one is available to accept delivery and will not attempt to deliver. The customer will be charged a re-delivery fee if the freight is returned to the terminal and sent out a second time due to failure to answer. This request does not add to delivery lead times.

Delivery appointment – The customer can request a delivery appointment (this will delay delivery 1 day). JSI truck customers (FR + ATL only) must respond to the delivery appointment call before noontime or freight may be assigned to a common carrier. For those customers whose orders ship via common carrier, they must respond to the delivery appointment call within 1-2 days or a storage fee will be incurred. The carriers will not hold freight for more than 2-3 days from the time of phone call/ message left.

Storage fees – Freight carriers will not hold freight without a storage fee being applied. If the customer cannot receive freight when it is ready, storage fees will apply at the expense of the customer. All carriers charge per day, charges vary by carrier.

Ship date – This can be found at the top right hand corner of the acknowledgement and is the day the order is scheduled to leave JSI's facility (not the delivery date).

Delivery date – JSI cannot guarantee delivery dates. Transit times vary by destination. The time starts the day after the order leaves JSI's facility.

Shipping changes – Any shipping-related changes, i.e. phone #, address, adding Residential/liftgate, must be submitted in writing via email.

Re-consignment fee – This will be applied if the order has already left the facility and the customer wishes to change the delivery address. The customer is responsible for this fee. Fees vary depending on carrier and destination.

Customer ship – Required for all orders shipping to any address outside a 50-mile radius of the dealer's sales rep zone; customers may choose JSI ship within their own state if the 50-mile radius is not within their sales rep zone. For Customer ship, the customer is responsible for all shipping arrangements and freight charges. On the day that the order is scheduled for completion, JSI will provide the piece count, shipment dimensions, and weight information via email. The customer must then provide JSI with a completed bill of lading. If any item is listed incorrectly on the Bill of Lading, the customer will be asked to fix said errors. The order may not ship out on the scheduled ship date if the completed bill of lading is not received in a timely manner.

Care and Maintenance

Basic Cleaning

To remove dust after installation and for initial cleaning, use a soft, lint-free cotton cloth to wipe down all exterior and interior surfaces.

For regular basic cleaning, use a soft, lint-free cotton cloth dampened with a mild detergent or soap, and warm water. For best result, use a "blotting" action rather than a wiping motion when cleaning.

Wipe up food spills and water spots immediately with a lint-free cotton cloth, so moisture is not absorbed into the cabinet surfaces.

Basic Care and Things To Avoid

When in doubt of a cleaner's suitability, do not use.

Never use scouring pads, steel wool, wire brushes or powdered cleaners.

Never leave a cloth moistened with cleaner on any cabinet surface for any length of time.

Check the areas around the sink and dishwasher to make sure that water and detergents to not dry on cabinet surfaces.

Avoid draping wet or damp dish towels over doors of the base cabinets.

Do not attach towel racks to the interior of the cabinet doors.

Avoid placing small kitchen appliances where the heat or steam is directed onto cabinet surfaces.

Do not leave printed materials (newspapers, magazines, etc.) on the cabinet surfaces, as the printing ink can bleed into the cabinet finish.

Cleaning Glass Door Inserts

Use a household glass cleaner with a soft, clean cloth.

Apply the glass cleaner directly to the cleaning cloth rather than on the glass or mirror.

Avoid excess glass cleaner running into cabinet joints.

Ammonia should never be used at full strength.

Disclaimers

Environmental Effects

Under normal circumstances all wood contains some moisture; it easily exchanges moisture with the environment. This effects all wood products even after finishing. Finishing the wood does slow the process, but it will still react to changes in humidity levels. When humidity is high, wood will expand in response to the absorption of moisture. When humidity is low moisture is lost, causing the wood to contract. Wood will not change in shape or size unless humidity levels change. When exposed to high humidity wood will primarily change in width and thickness. Normal minor variations in humidity will cause imperceptible minor dimensional responses in the wood. Maintaining a 40% to 50% humidity level within the household should avoid environmental changes in your cabinetry. Extreme changes in humidity levels, 80% or above and 20% or below can cause problems. Wood performs best in controlled environments. Problems associated with warping are usually the result of conditions at site storage, poor installation, or use. The effects of moisture can include panel expansion or contraction, joint separation, (especially in mitered doors), and bowing, expansion, or contraction of frame stiles and rails. Product failure is most prominent in high moisture conditions and environments. These include waterfront properties and coastal regions. Moisture control is most important in these environments and is highly recommended to help maintain your JSI cabinetry. Doors with 5-piece construction are engineered to allow for some expansion and contraction of the panels.

Painted Wood Cabinets

Expansion and contraction can create open joints in the finish of painted cabinetry, this is a normal occurrence. An open joint line is not considered a defect and is widely accepted in the kitchen cabinet industry. The finish will still protect the surface, and the structural integrity of the joint will not be affected. These issues are shared by every manufacturer of painted all wood cabinets and are not unique to JSI.

Wood may expand and contract differently from cabinet to cabinet. Even joints within the same cabinet may behave differently. Some joined wood may not show any joint lines, others may be slightly visible, while others may display easily visible joint lines.

Joint lines may also occur due to the repeated impacts from everyday use if soft close hinges are not installed.

An exposed open wood joint can be damaged from prolonged exposure to water or high moisture levels. Therefore, wipe off any excess moisture from cabinet surfaces as soon as possible.

Discoloration

All paints, especially lighter colors, are susceptible to discoloration due to airborne particles such as those caused by cooking, grilling, tobacco smoke, fireplaces, and candles. Prolonged exposure to natural or artificial light may alter the finish color. Moisture may also discolor the finish.

Installation

It is extremely important that all base cabinets are perfectly squared during installation for proper drawer alignment. This should be verified prior to countertop installation.

Stained Wood Cabinets

Solid wood will expand or contract with changes in temperature and humidity. Such conditions are not indicative of faulty materials or craftsmanship. In the winter, when temperatures fall or when humidity levels are low, contraction may cause a narrow unfinished line to appear on stained wooden cabinets. To blend these lines into the finished wood, apply pigmented furniture polish. Touch-up kits are available for purchase through JSI also.

Maintaining a consistent color is a common challenge in any industry using real wood because wood is a natural product that has inherently different colors. It is important to recognize these character differences and understand that every product made from real wood will vary slightly from cabinet to cabinet and even within a cabinet door or component.

The Effects of Exposure to Light

Exposure to light will change the color of real wood in a very short period of time. When purchasing any wood product, it is important to understand that the sample or display you are making your selection from may be aged. Therefore, it will represent what your cabinets may look like in time and will not represent what they will look like when they are factory new. Conversely, a freshly produced sample will match more closely your freshly produced cabinets, but will not represent the way they will look when aged.

JSI CABINETRY

DESIGNER SERIES

Limited 5-Year Warranty

JS International, Inc. warrants its Designer Series products to be free from defects in material or workmanship for a period of five years. JS International, Inc., at their choice, may elect to repair or replace any JSI product covered by this warranty.

This warranty does not apply where items have been improperly stored or improperly installed. This warranty does not cover the following: costs of removing warranted material or the installation of replacement material, natural variations and aging inherent in wood, normal wear and tear or damage/defects caused by misuse, abuse, negligence or modification in any way. This warranty does not apply to products purchased without finish.

JS International, Inc. reserves the right to inspect claimed defective products. No returns, replacements or repairs may be made without prior written consent. Some replacement parts may vary from those originally supplied and are subject to availability.

This warranty is the sole warranty of JS International, Inc. and in lieu of all other warranties, express implied, including any implied warranty of merchantability and fitness for a particular use. Labor charges for removal of or installation of warranted material as well as incidental or consequential damages are excluded. We do not assume for us any other liability in connection with the sale of your product.

Special Door Considerations:

The purchaser agrees to let doors that are warped or have panel shrinkage a ¼″ or less to hang for one season (Spring) before replacement is requested. Typically a door will return to its normal position once it is acclimated to temperature and humidity conditions. Prior to requesting a replacement for a door, please be sure the door has been installed properly.

To file a claim on this warranty contact your local authorized JSI dealer.

Some states do not allow the exclusion or limitation of implied warranties or of incidental and consequential damages, so this limitation or exclusion may not apply. In such case, the duration of any implied warranty shall be the same as that of the expressed warranty as stated herein.

JSI Cabinetry
485 Commerce Drive, Fall River, MA 02720
Tel: (508) 675-4722

JSI CABINETRY

PREMIER SERIES

Premier Limited Warranty

JS International, Inc. (warrantor) warrants to the original consumer purchaser only that all products manufactured or supplied by warrantor will be free from defects in material and workmanship under normal use and service for one (1) year from the date of purchase. (Proof of purchase required.)

This warranty does not cover damage resulting from normal wear, accident, misuse, dirt, water, tampering, unreasonable use, improper installation, service performed or attempted by unauthorized service agencies or units that have been modified or used for commercial purposes.

If the product exhibits such a defect, please call JS International, Inc. (800-239-0036) or write with a description of the defect. JS International will, at their option, provide repair or replacement parts or replace with a functionally equivalent product. Such repair or replacement parts or products shall be at warrantor's expense, but consumer shall bear all other expenses, including but not limited to, cost of removal, transportation, re-installation, communication and any special service requested by you such as overtime labor, etc. Repaired or replaced items carry only the unexpired portion of the original warranty.

Except to the extent provided by applicable law, all implied warranties, including warranties of merchantability and fitness for a particular purpose, we are limited in duration to the shorter of the period provided by law or the period of this warranty, and under no circumstances shall JS International be liable for incidental damages sustained in connection with the product. The express warranty above constitutes the entire warranty and is in lieu of all others expressed or implied.

Special Door Considerations:

The purchaser agrees to let doors that are warped or have panel shrinkage a ¼˝ or less to hang for one season (Spring) before replacement is requested. Typically a door will return to its normal position once it is acclimated to temperature and humidity conditions. Prior to requesting a replacement for a door, please be sure the door has been installed properly.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitation on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other legal rights which vary from state to state.

- All orders must contain the original PO and invoice numbers and very specifically the reason for ordering.
- All damage and missing item claims must be reported within 30 days of delivery.
- Original cabinets or parts may require return to JSI for credit.
- Please e-mail any photos of damaged items.
- If damage/shortage is due to the trucking company you must provide a delivery receipt signed by the driver also stating the damage/ shortage noticed at the time of delivery.
- Replacement orders will always reference the original PO#. If you want the order to reflect a new PO#, please furnish in "Tag for" box.

Assembled cabinets cannot be returned.

List item(s) you would like to return.

JSI ITEM NUMBER	QUANTITY	REASON FOR RETURN

You must be given a return authorization number by JSI Cabinetry before we accept any item being returned. If you do not receive an authorization number, JSI has not approved the return. The form we email to you must be attached to the outside of your return shipment. If the form is not attached we will not accept delivery and your company will not receive credit. Issuance of Return Authorization does not guarantee issuance of credit. If credit is to be issued, it will be issued by JSI upon receipt and inspection of item being returned, minus any freight charges and restocking fees, if applicable.

Pairing the Receiver to the Dimmer Switch

1. Remove the clear plastic tab from the Dimmer battery compartment to activate the battery.

2. Connect all lighting parts and plug into a power source. Press once (do not hold down) on the black Learning Key on the Receiver, then press once on the Dimmer button. The lights should flash on/off, indicating they are paired and programmed properly. Each Receiver can be controlled by up to 8 different Dimmers.

3. To deprogram a Receiver, hold down the black Learning Key until the lights connected to the Receiver flash on/off twice. The Receiver is now reset and is no longer paired with any Dimmers.
