The New Design Element

- **Easy Installation**
- **Designs that Last**
- **Built to Last**
- **Premium Design**
- **Low Maintenance**
- **Made in the USA**

Material Summary

Platinum Series

Composite Panels

- **Aztech Composite (AZT)** - A water resistant, durable and ultra light-weight panel suitable for a variety of interior and exterior uses. Gel-coated and available with a fire retardant core.
- **Aluminum Composite Material (ACM)** - Solid core panel that is light-weight, maintenance free, durable and excellent for routing and die-cutting. Class A fire rating standard.
- **Structural Foam Composite (SFC)** - Heavy-duty panel with a high density structural foam core when excellent screw retention is required. Available in a variety of thicknesses and densities. Suitable for outdoor uses and as walls, ceilings, and flooring for recreational vehicles, trucking, and modular buildings.

Gold Series

Cultured Marble

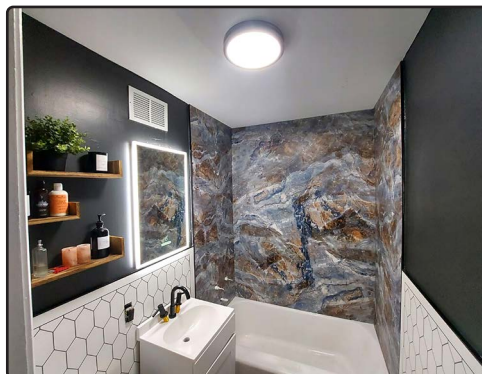

- A commercial-grade panel with the look and feel of natural stone and solid surface.
- Non-porous.
- Better protected than natural marble.
- More resistant to damage and staining.
- Significantly lighter than quartz and solid surface.
- Easy to cut.

Silver Series

PVC

- **Sheets** - An ultra lightweight panel at an entry level price point for a variety of interior uses like wall-cladding, wet walls, and backsplash.
- **Paneling** - Easy and quick tongue & groove installation (with hidden fasteners) that can install directly on studs; an ideal alternative to drywall or fiberglass. Ideal for garages, barns, commercial buildings, basements when covering a large coverage area. Great option for ceilings in place of wood.

Choose from our digital design library of over 300 premium designs or work with our design team to create a design unique to you.

BUILT TO MAKE YOUR JOB EASIER

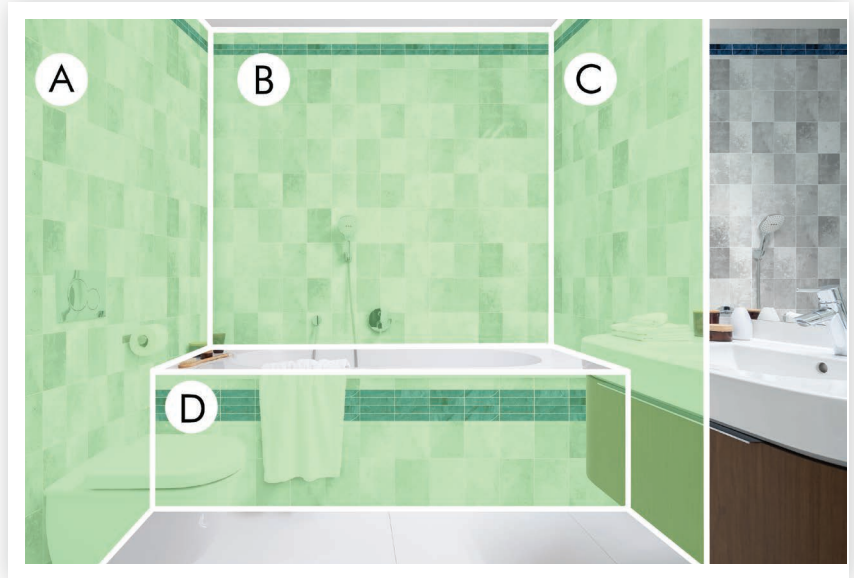

PR 11 Advanced Finishing System

All panels are finished with our cutting edge PR11 Advanced Finishing System, creating a high-resolution image using a water-based, UV-cured, high protective coating free of volatile organic compounds (VOC's) along with temperature-controlled curing to ensure consistently high-quality finishing.

Cut less and save more with the perfect fit

We can create panels in the exact size you need to go floor to ceiling and wall to wall. Anything to 13' in width to 40' in length.

Can order panels as **Class A Fire-Rated** and **Non-Fire Rated**

Easy Installation

Panels can weigh 80% less than other tile options and can be installed up to 10x faster than traditional tile.

Premium Design

Choose from our digital design library of over 300 premium designs or have our design team create something to fit your unique design aesthetic.

Designs that Last

Out of stock and discontinued designs are a thing of the past. With our digital finishing process your designs are securely stored and always available.

Low Maintenance

Mildew, moisture and stain-resistant with an anti-microbial protective clear coat that makes it easy to keep clean.

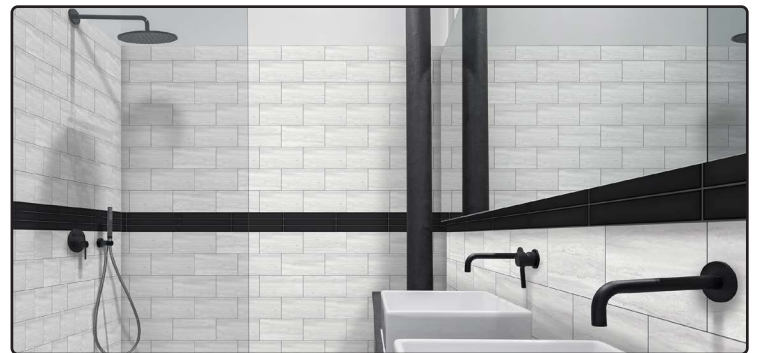

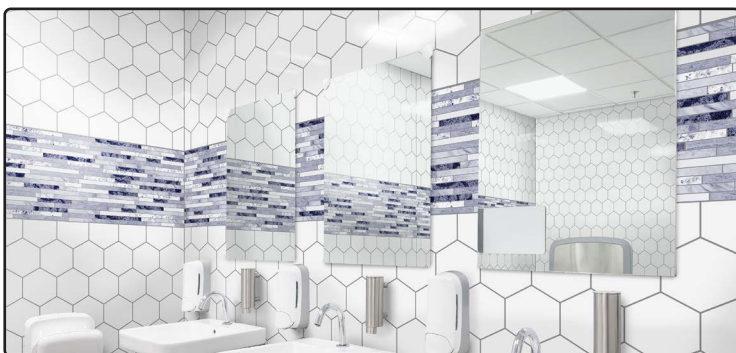

Built to Last

Unmatched durability means there's less breakage and your installed walls can withstand the toughest environments.

Made in the USA

We're dedicated to delivering the highest quality products, and since our panels are made here in Crossroads of America, you can receive them quickly and without the hassles and expense of international freight.

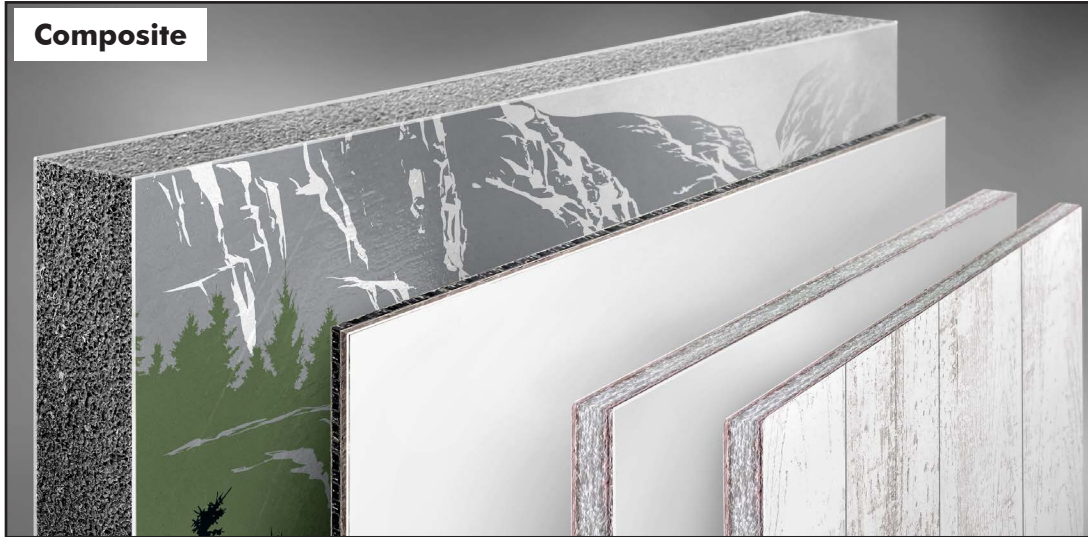

Premium Rock

The New Design Element

The New Design Element for Panels in 4 easy steps:

- Step 1 Choose substrate
- Step 2 Choose size and thickness
- Step 3 Choose design
- Step 4 Choose finish

Platinum Series

SFC - Structural Foam Composite

- COMPOSITION: Two gel-coated sheets bonded to Structural Foam Composite.
- THICKNESS: Various.
- SIZES: 48x96, 48x120 and 60x120 std. Cut to size available
- FIRE-RATED: Optional Class A
- OPTIONS: Delivered with routing and/or die-cutting.
- WATERPROOF: Yes
- OUTDOOR USE: Contact us
- FINISH: Matte or Gloss

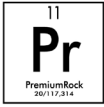

ACM - Aluminum Composite Material

- COMPOSITION: Aluminum sheets bonded to a solid core.
- THICKNESS: 3mm and 6 mm standard / Custom avail.
- SIZES: 48 x 96 and 60 x 96 standard
- FIRE-RATED: ASTM E84 Class A
- OPTIONS: Delivered with routing and/or die-cutting.
- WATERPROOF: Yes
- OUTDOOR USE: Contact us
- FINISH: Matte or Gloss

AZT - Aztech Composite

- COMPOSITION: Gel-coated sheets bonded to polypropylene / fiberglass core
- THICKNESS: 5mm standard / Custom availble
- SIZES: 48x96, 48x120 and 60x120 std. Custom available: Up to 13'wide x 40' Cut to size available
- FIRE-RATED: Optional Class A
- OPTIONS: Delivered with routing and/or die-cutting.
- WATERPROOF: Yes
- OUTDOOR USE: Contact us
- FINISH: Matte or Gloss

Silver Series

PVC Paneling

COMPOSITION: PVC tongue and groove with nail flange. Direct to stud.

THICKNESS: 1/2 inch

SIZES: 16" wide x 12' standard
8', 10', also available

FIRE-RATED: ASTM E84 Class A

WATERPROOF: Yes

OUTDOOR USE: No

FINISH: Matte or Gloss

PVC Sheets

COMPOSITION: PVC

THICKNESS: 2mm, 3mm and 8mm standard
Custom thickness available

SIZES: Various - Can be cut to size
2mm/3mm max is 80 x 120"
8mm standard is 60 x 120"

FIRE-RATED: 3mm only and depends on manufacturer

WATERPROOF: Yes

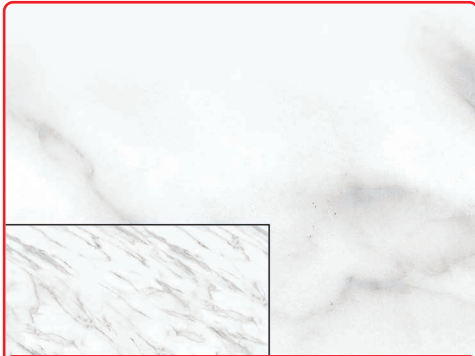

OUTDOOR USE: No

FINISH: Matte or Gloss

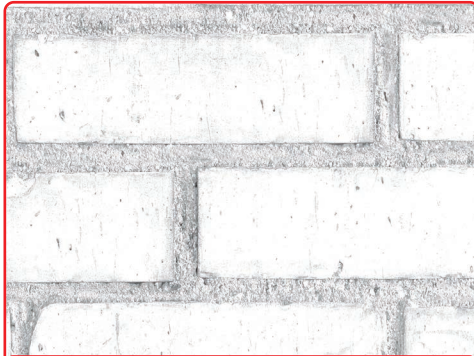

ENDLESS DESIGN POSSIBILITIES

Marble, granite and woodgrain designs that feel so authentic to the touch, your customers won't believe it's not the real thing. Intricate patterns and textures that add depth and dimension to any space.
