RAUVISIO CRYSTAL MIRROR

The polymer mirror from REHAU

Mirrors are a key element of sophisticated interior design and can be found everywhere, from entryways to bathrooms and bedrooms. With RAUVISIO crystal mirror REHAU offers a mirror for every application, which puts hardly any constraints on creativity.

Can be processed

with common wood working tools

Easy to clean

thanks to dirt-resistant coating

50 % lighter

than real glass mirror

10 x more break-resistant

than real glass mirror

20 % less waste

compared to real glass

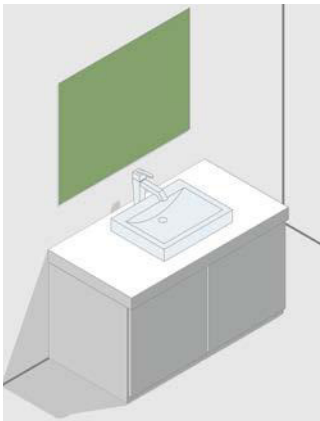

RAUVISIO CRYSTAL MIRROR

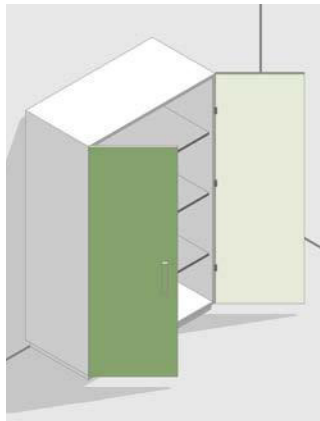

Versatile application possibilities

Thanks to its polymer properties, RAUVISIO crystal mirror can be processed in numerous ways, regardless of whether it is for individual pre-cuts or drill holes. Grooves also provide an array of additional design possibilities; when positioned on the rear side for example, they make it particularly easy to install a backlighting. Free-form parts are not a problem with RAUVISIO crystal mirror either.

Possible applications:

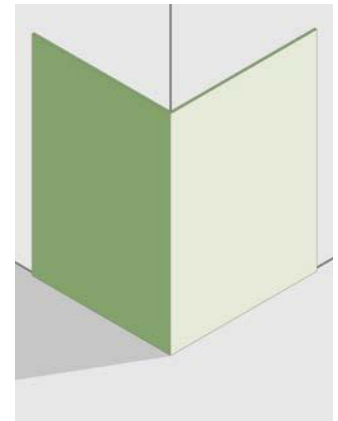

Wall mirrors

Mirror fronts

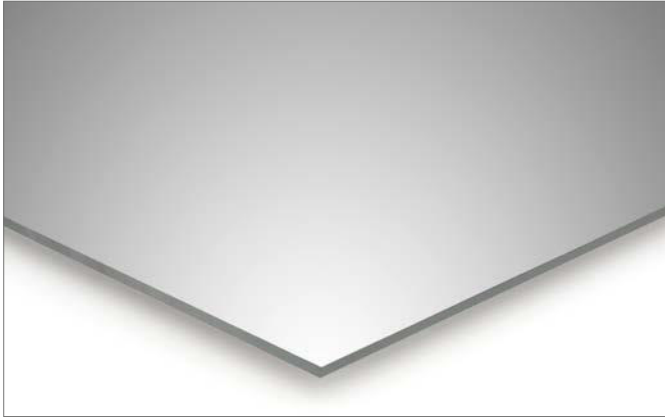

Door mirrors

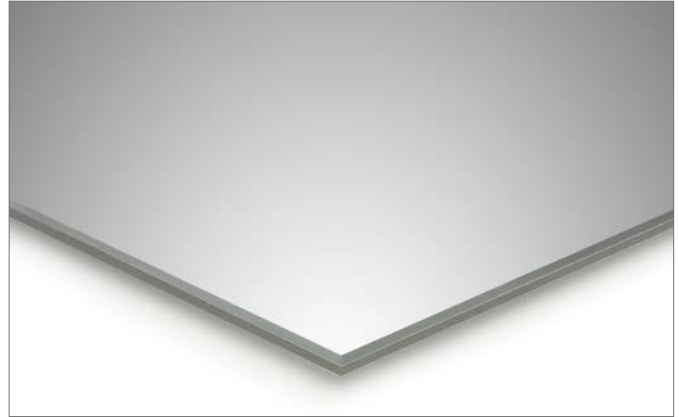

Wall covering

RAUVISIO CRYSTAL MIRROR
